Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, 17, 18, 22, and 23, drawn to a method of making a laminate comprising a heat resistant resin film and a metal thin film, classified in class 264, subclass 311.
- II. Claims 9-16, 19, 20, 21, 24, and 25, drawn to a laminate comprising a heat resistant resin film and a metal thin film, classified in class 428, subclass 458.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed could be made by a materially different process. For example, the metal thin film could be laminated to the heat resistant resin film or plated by an electroless method.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
